Normal Birth, Physical Protection, Joyous Infancy, and a Useful Education, Are Declared the Birthrights of the Little Ones Of Today.

(By Edward T. Devine.) (Charities and The Common Press Bureau.)

In certain cotton raising district of the South there is a strange saying that cotton and ignorance go naturally could have a glorious vision of the together. A man's wealth-that is to of not his well being, which would be at enough, but his money income-

HELPLESS AS BABY

own in Mind Unable to Work, and What Helped Her.

Summit Point, W. Va .- Mrs. Anna elle Emey, of this place, says: "I suf-red for 15 years with an awful pain in y right side, caused from womanly puble, and doctored lots for it, but withit success. I suffered so very much, at I became down in mind, and as helpss as a baby. I was in the worst kind shape. Was unable to do any work. I began taking Cardui, the woman's mic, and got relief from the very first ose. By the time I had taken 12 botles, my health was completely restored. am now 48 years years old, but feel as good as I did when only 16.

Cardui certainly saved me from losing my mind, and I feel it my duty to speak in its favor. I wish I had some power over poor, suffering women, and could make them know the good it would do

If you suffer from any of the altments peculiar to women, it will certainly be worth your while to give Cardui a trial. It has been helping weak women for more than 50 years, and will help you,

Try Cardul. Your druggist sells it.

efficiency of the adult, Could there be a clearer expression of the old, dis credited view of the child? The bug . made to fit the child, while the school term is adjusted not to the child but the center of the economic world and He never to himself hath said: domestic world, and this means that

Cotton and Ignorance Linked. Thus cotton and ignorance are linked together, not naturally, but most unnaturally, and the industry which is otherwise the pride of the South and Spelling Match and ice cream supper of America is blighted, not only in the at the School house Saturday evening, mill but from the hour of its planting. April 18th. All are cordially invited, joining the sweated industries of the torthern cities and the glass works of northern towns as an active cause of

> degeneracy and race snielde. Though it may be reprehensible for the race to perish for lack of births. it is a more shameful thing to destroy the vitality, to dwarf the minds, to refuse the natural and necessary protection of childhood to the children who are born into the world.

New View Not a Revelation.

The new view of the child, which we may place against this background, has not been revealed by any single miraculous illumination. Would that some apostle on the way to Damaseus divinity indwelling in the soul and body of the unspoiled child! But it is not so that social workers are guided neasured by the number of his child to the formulation of their new ideals

First there is the right of the child o be born. When the Children's Bureau was established in Washington it may well begin its labors by an investiga tion of sterility, absortions and still births. The new view, the religious riew, the social view, the physiological view, the rational view of the child from every standpoint is that the right to birth itself must not be abridged.

Right to Be Well Born.

The right to be well-born is followed a the new view of the child by the ight to grow up. We are doing beter than our forefailness in this respect, Two hundred years ago in London three-quarters of all the children that were born died before the completion of their fifth year. Decade after decade that percentage has been pushed down until now it is something like 25 istead of 75 per cent.

Even now, in 1900, in the registraion area of the United States, the paper, leath rate for all children in their first var is 165 in the thousand. Milk poi oning, ignorance of mothers as to how a reed and care for their children, in didlity to nurse them, either for phy sical or for economic reasons, lack of occessary facilities for surgical treatnent, and lack of knowledge in the uk and file of the medical profess
